

**Energy Usage and Greenhouse Gas Emissions**  
**Village Roadshow Limited Group – Australian based businesses**  
**for the year ended 30 June 2009**

Details of the VRL Group's Greenhouse Gas (GHG) emissions (Scope 1 and 2 emissions of carbon dioxide equivalent) for VRL's Australian based businesses split between Divisions for the year ended 30 June 2009 were as follows:

The largest single source of emissions for the VRL Group is electricity, which makes up over 90% of the total emissions VRL will report under the *National Greenhouse Energy Reporting Act*. As such the split of electricity usage amongst VRL's divisions closely mirrors the split for GHG.
